GRANITE ROUND

Granite is one of the best materials available today to meet the ever changing and sophisticated applications demanding coplanarity, perpendicularity, parallelism, flatness, and straightness. Chosen for its stability and high accuracies, **PRECISION GRANITE** manufactures single granite machine bases, air bearing surfaces or multiple component assemblies to meet industry needs.

Our capabilities range from custom lettering and logos, critical testing & checking surfaces, to coplanarity on multiple planes. We can manufacture a single customized application to high volume requirements.

With **PRECISION GRANITE** you can depend on excellent quality, high accuracies, and quick delivery.

California quarries meet most of our granite needs.

We also import granite slabs from South Africa and other parts of the world to meet customer requirements.

Please contact us for **inserts**, drilling and slotting, airbearing applications, engineering, and design assistance.

### CUSTOM MACHINING

We can custom quote from the following formats: PDF, DWG, DXF™, DWF, eDw, JPEG, and RASTER IMAGES

**We are proud manufacturers of USA made products!**
